

I am a parent, a Woodland community member and a Proud American. I grew up in Camas, graduated Camas High in 1998 and obtained my BSBA from DeVry in 2001. My family moved to Woodland in Feb 2020 right before covid hit, and soon after is when I realized I wanted to be more involved. After months of researching and speaking to teachers, parents and community members, I realized a strong, courageous voice is necessary in securing our children's futures, and I want to be that voice. Parents need to feel confident their kids are being kept safe and properly educated at school, but that confidence is gone. Our phone calls, emails and letters are being ignored and our voices silenced. It seems like nobody will listen to reason, and our kids are still suffering.

Schools are for teaching literacy, not indoctrination. I promise to be efficient, transparent, honest and open to all. Did you know that Woodland school board does not record their public meetings? This will be my first order of business when I am elected, to have all meetings recorded so parents and community can get to know the board, hear all conversations and understand why all votes are made. Budgeting and making sure all resources are used to serve the families is also my priority.

I oppose all forms of racial supremacy and I believe Critical Race Theory is dangerous and does not belong in schools. Instead, I will dedicate myself to promote teaching America's essential principles. CRT will teach our kids to be racist, to judge others by the color of their skin and to hate America. This will destroy everything Americans have worked so hard for, and it will also kill Martin Luther King's dream. Schools are for education, not indoctrination! Not only will I protect students from this racial segregation, I will stand up for our teachers also. My voice will encourage the proper education and skills needed for our children to grow and thrive to be positive, proud, productive members of society. Woodland schools will stay safe, supportive and welcoming for everyone.

Masking is unhealthy and dangerous, but even with Fauci's exposed emails confirming masks do not prevent spreading or contracting covid, the "experts" are still claiming masking is the only way to combat covid until all children are able to be vaccinated, and they plan on implementing masks next school year. These are the same "experts" who have been lying to us for over a year now, and continue to abuse our children. I am 100% against giving children an experimental shot for a virus that rarely affects them with a death rate next to zero, that is not FDA approved and has killed over 5,000 people in less than 6 months (and that's only 1% being reported on VAERS). Based on all of this data, I would never allow this shot near our schools or the students, ever.

Our kids have lost over a year's worth of education, socialization and life skills. They have been impacted emotionally, mentally and physically with a burden that was never theirs, and it is up to us to make sure this never happens again. We need community to come together, to unite and say no more. I am here to speak the truth, to resist tyranny and do everything for our children, the leaders of tomorrow.

With my experience, knowledge and education, I am confident my strong leadership will benefit our students and schools. Like many others, I have always trusted the school boards, administration and state legislatures have been doing what's best for our children, however, we are finding this is not the case. The school board refuses to utilize their authority, not taking any responsibility and referring concerned parents and community to the state. From personal experience, I can confirm that contacting the state is a waste of time. It seems our elected officials are no longer representing the people, ignoring and rejecting us, which is why we need strong, courageous true leaders at our grassroots. I believe I can be that leader with a strong voice to educate and empower my teammates,

encouraging them to only do what is in the best interest of the students. Our children have suffered enough, and they deserve better.

Feel free to reach out anytime! My contact info is below, and I host a community kickball game on Saturdays, 3pm at Horseshoe Lake Park if you want to come by & say Hello!
